

## **Altech Advanced Materials AG: Release of the total number of voting rights according to article 41 WpHG**

Heidelberg (pta017/06.08.2021/10:35) - Publication

### 1. Information on the issuer

Altech Advanced Materials AG

Ziegelhäuser Landstraße 3, 69120 Heidelberg, Germany

### 2. Nature of the capital measure

Other capital measure (Section 41 (1) WpHG)

Status as of / Dastum of effectiveness: 05.08.2021

### 3. New total number of voting rights

5,650,000

(end)

### **About Altech Advanced Materials AG**

Altech Advanced Materials AG ("AAM") currently plans to subscribe up to 49% in Altech Chemicals Australia PTY LTD ("Altech Australia") for up to USD 100 million from Altech. AAM is currently implementing its capital raising strategy to be able to fund the investment.

Altech Australia is currently building a high-purity alumina (99.99%, 4N HPA) production facility for 4,500 tons p.a. in Malaysia and also has its own deposit for the mining of the main raw material kaolin. 4N HPA is needed for the production of LED lights as well as a separator for lithium-ion batteries, e.g. needed for electric vehicles and smartphones. Market demand for 4N HPA is expected to grow with a CAGR of 30% p.a. until 2028. The process patented by Altech Australia allows the production of HPA as cost leader, as the HPA can be obtained directly from kaolin. This allows production without the use of energy-intensive aluminium. The production volume for the first 10 years is secured by an off-take agreement with Mitsubishi Australia and the production capacity and quality is guaranteed by the German plant manufacturer, SMS group GmbH, Dusseldorf, which has also agreed to contribute in equity to the Altech HPA project.

The project has an investment volume of approximately USD 390 million, of which KfW-IPEX Bank has already committed USD 190 million under certain conditions and of which USD 10 million is assumed as equity investment from SMS group GmbH. Altech Chemicals is in talks with Macquarie Bank on the provision of USD 90 million in mezzanine capital. The remaining USD 100 million is to be made available by AAM.
